**MUST SELL BATTENFELD FISCHER BFB1-6D**

**This excellent 1993 dual shuttle, continuous extrusion blow molding machine is complete and can be purchased with molds, head, takeout tooling and everything you need to get tri-layer bottles into production. The available molds that fit the 2x200mm head are 1 qt., 60oz, and 112oz laundry detergent style containers. We have bottle photos, spec. sheets and more for this machine. All reasonable offers will be considered. Click the photo to see more about the machine on our website.**

---

**[Bekum H-111](#)**

Click the photo to see a video of this machine dry cycling in our facility. It has recently been removed from power and can be seen here in lovely Garden City, Missouri. Come view the machine and take a tour around our expansive complex. It is available with a variety of

processing heads from our inventory and has a 60mm extruder. It is equipped with a parison hot knife assembly, upgraded PLC controls and has a 40 HP AC VFD. Reply to this email, or call (816) 862-8703 for more details or to get a quote, but hurry it won't be available much longer.

---

## **Twin Uniloy Milacron UMS 100/D**

**LOW HOURS!** These two excellent, dual shuttle blow molding machines have only produced one PP container since they were installed. They are single owner machines with single heads and bottle takeout capabilities. One was manufactured in 2008 and the other in 2010. They are located here in one of our warehouses and are priced to sell. Take both and get a spectacular package discount.

## ABB VFD

We have an amazing variety of electrical components for your industrial applications. This is a NEW ABB model number ACS800-PC-0270-5 AC Variable Frequency Drive with Nema 12 enclosure.

## 2008 Novatec ND-50

This like-new Novatec resin drying system is rated at 50 lbs. per hour. Hopper and controls are mounted on a portable stand for beside the press use. It also comes with the vacuum receiver shown under the dryer. Click the photo to see more on our website and to request a quote.

**Pre-pinch Parison Knife Assemblies Made Just For You!**

**We manufacture  
pneumatic pre-pinch  
parison knife assemblies!**

**You heard that right, we  
build these in-house for  
your blow molding  
machines. We also have  
hot knife transformers,  
rheostats and knife  
material in stock.**

## **Bekum Extrusion Blow Molding Heads Are Here!**

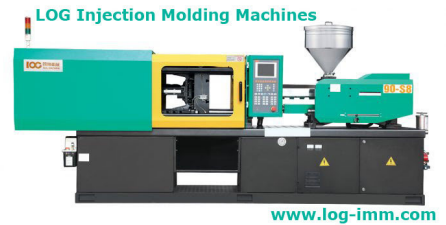

**We have a very large selection  
of processing heads available.  
Most of these are in fantastic  
condition and can be shipped  
to you ASAP.**

**On the left we have the Rock  
Valley Tool 2x180mm PE for  
processing Polyethylene. It  
has the large 6" bore  
programming cylinder and  
comes with bushing heaters. It  
is currently fitted with a  
Bekum style threaded head  
adapter.**

**On the right you see our 2002  
4x75mm W. Muller S4/35-75 T-  
PE, TK, 1K processing head,  
serial number 14369. This one  
is also available with the  
mounting flange and is in  
"like-new) condition.**

**Offering NEW products from the following equipment manufacturers.**

### Tons of Blow Molder Components!

Are you needing to add or upgrade a parison programming system? These 64 point Hunkar 311S2 digital controllers are exceptionally well known in the EBM industry. We have 3 currently in stock. They come complete with 322S2-3 Auto Sync Module and one 311S2-5 Weight Control Module.

Call (816) 862-8703 or reply to this email for a quote.

Remember, if you didn't find what you need here give us a call or reply to this email to submit your request.

**Nelmor 150 HP Granulator**

**NEW Zerma 10 HP Granulator**

Do you have a little bit of scrap to grind up? This heavy duty granulator might take care of that for you. It is model #G2056MB and is available with or without the feed conveyor. Click on the photo or call 816-862-8703 for details.

We represent Zerma size reduction equipment. Click for a video showing the low speed Zerma GSL300/400 grinder being tested on LDPE bottles. These are perfect for low density PE products due to the slow, direct drive rotor which generates less heat and dust. We have 2 immediately available. Each has a 7.5 kW direct drive motor and segmented 33 knife solid rotor. They are still in factory packaging.

The conveyor shown above is our PPE Model FT-2412VS. It has a 24" wide FDA & USDA approved smooth, white, 2 ply monofilament belt and is 12 feet long. This one requires 115 Volt power and has a variable speed controller. Reply to this email for more info or click on the photo for more details. We have many other conveying options available.

**We renew, reuse, and recycle equipment and parts for the good of our customers and the planet.**  
**Turn your unwanted, surplus items into cash or trade for items you need.**  
**Give us a call at (816) 862-8703 today!**
